

## Harvest Hues Felt Outline

Print at 100%. Cut out the paper template below and test to make sure that it is at least 1/4" larger than your embroidered leaf on all sides. When you cut your felt, it should be at least 1/4" larger than the finished embroidered leaf on all sides. If it is not large enough to give you 1/4" all around, use either your printer to enlarge it, or draw a slightly larger outline around the template shape, or cut your felt slightly larger than the paper template.
